

Course Title	Oral Medicine / Oral Pathology III				
Course Code	DES425				
Course Type	Compulsory				
Level	Bachelor (1 <sup>st</sup> Cycle)				
Year / Semester	4 <sup>th</sup> year / 7 <sup>th</sup> semester				
Teacher's Name	TBA				
ECTS	1	Lectures / week	1 hr / 13 weeks + exam week	Clinic / week	1 hr / 13 weeks
Course Purpose and Objectives	<p>The aim of this course is to provide students with the knowledge to understand chronic, recurrent and medically related disorders of the oral and maxillofacial region in multiple levels in connection the past semesters Oral Medicine and Pathology curriculum.</p> <p>Furthermore, the course aims at allowing students to progress to a more advanced oral medicine and pathology level.</p>				
Learning Outcomes	<p>Upon successful completion of this course students should be able to:</p> <ul style="list-style-type: none"> <li>Analyze and describe oral and maxillofacial intraosseous benign and malignant tumors, inflammatory jaw lesions and odontogenic cysts and tumors</li> <li>Explain the etiology and pathogenesis of oral and maxillofacial soft tissue neoplasms, inflammatory jaw lesions and odontogenic cysts and tumors</li> <li>Discuss clinical features histopathological findings and treatment modalities of the above-mentioned lesions</li> <li>Formulate a differential diagnosis in order of probability</li> <li>Perform necessary special tests and diagnostic procedures</li> <li>Interpret the findings</li> <li>Specify systematically an appropriate treatment plan based on patient's assessment, laboratory results and diagnosis</li> <li>Discern benign lesions from malignant</li> <li>Recognize all stages of oral cancer</li> <li>Discuss the aetiology, the clinical signs and symptoms and the importance of early recognition and referral to a specialist for further investigation</li> </ul>				

	<ul style="list-style-type: none"> <li>• Inform patients about risk factors of oral cancer and assist preventive action that contributes to patient's oral and general health</li> <li>• Discuss, through interactive lectures, clinical cases with special focus on describing basic oral lesion, patient's signs and symptoms diagnostic procedures and differential diagnosis</li> </ul>		
Prerequisites	None	Co-requisites	None
Course Content	<p>Lectures and Labs:</p> <ul style="list-style-type: none"> <li>• Intraosseous Tumors A. Benign</li> <li>• Intraosseous Tumors B. Malignant</li> <li>• Odontogenic Cysts Inflammatory Jaw Lesions</li> <li>• Inflammatory Jaw Lesions</li> <li>• Odontogenic Tumors</li> <li>• Clinical Case Presentation</li> <li>• Leukoplakia- Erythroplakia and Potentially Malignant Disorders</li> <li>• Reactive White Keratotic Lesions</li> <li>• Oral Cancer I</li> <li>• Oral Cancer II</li> <li>• Clinical Case Presentation</li> <li>• Pigmented Lesions A. Exogenous Pigmentation B. Melanocytic Pigmentation</li> <li>• Review</li> </ul> <p>Students will familiarize themselves with:</p> <ul style="list-style-type: none"> <li>• Intraosseous Tumors: Benign and Malignant</li> <li>• Inflammatory Jaw Lesions</li> <li>• Odontogenic Cysts</li> <li>• Odontogenic Tumors</li> <li>• Leukoplakia, Erythroplakia and Potential Malignant Disorders</li> <li>• Oral Cancer</li> <li>• Pigmented Lesions of the Oral Mucosa</li> </ul>		
Teaching Methodology	Face-to-face
