

Course Title	Endodontics VI				
Course Code	DES505				
Course Type	Compulsory				
Level	Bachelor (1 st Cycle)				
Year / Semester	5 th year / 9 th semester				
Teacher's Name	TBA				
ECTS	4	Lectures / week	1 hr / 13 weeks	Clinic / week	3 hrs / 13 weeks
Course Purpose and Objectives	<p>Provide students experience on complex endodontic cases: unusual anatomic root canal configuration and endodontic-periodontic lesions. Provide prognostic skills in non-surgical root canal treatment and re-treatment.</p> <p>The students will be trained in clinical endodontics: Diagnosis of endodontic pathoses and practice in root canal treatment and re-treatment in single-rooted and multi-rooted teeth with vital and necrotic pulp with or without apical periodontitis.</p>				
Learning Outcomes	<p>Upon successful completion of this course students should be able to:</p> <ul style="list-style-type: none"> • Diagnose endodontic pathoses in teeth with complex anatomy or endodontic-periodontic lesions • Perform and evaluate the initial, diagnostic and post-obturation radiographs in cases of post-treatment apical periodontitis • Practice all steps of primary and secondary non-surgical endodontic treatment in single and multi-rooted teeth. • Evaluate indications, contra-indications in non-surgical root canal re-treatment and surgical endodontic treatment. 				
Prerequisites	None		Co-requisites	None	
Course Content	<ul style="list-style-type: none"> • Case studies on diagnostic problems and treatment planning in teeth with complex anatomy and procedural errors. • Seminars on the advanced imaging in endodontics. • Seminars on the relation of endodontic treatment strategies with periodontology, operative dentistry, orthodontic treatment and oral surgery. <p>Clinical work - Diagnosis, treatment planning and primary root canal treatment in single and multi-rooted with or without apical periodontitis.</p>				

Teaching Methodology	Face-to-face
